

Miniature Thin Film Four Channel Pyroelectric Sensor

Introduction

Unlike other pyroelectric materials, the Pyreos thin film pyroelectric sensors can be reduced in physical size and still provide high sensitivity with fast frequency operation, enabling this highly stable four element sensor in a TO39 package. This current mode sensor offers performance in a small footprint and up to 100 Hz data monitoring. The sensor has internal CMOS trans impedance amplifiers, with 10 GΩ feedback resistors outputting voltage signals centred around half the supply rail. A range of IR filters are available.

Sensor Characteristics

Filter aperture	1.4 mm x 1.4mm
Element size	700 μm x 325 μm
Package	TO39
Responsivity ¹	100,000 V/W
D* ¹	1.5 x 10 ⁸ cm√Hz/W
Noise ¹	40 uV√Hz
Op amp with 10 GΩ feedback resistor	

Electrical Characteristics

Max. Voltage (+V)	5.0 V ²
Min. Voltage (+V)	2.7 V ²
Recommended Offset V	(+V / 2) ²
Microphonics	S _{vib} ~ 1 μV/g at 10Hz
Time Constant	~10 ms
Operating Temperature	-40 to +85 °C
Storage Temperature	-40 to +110 °C
Offset V max	(+V) - 0.1 V ²
Offset V min	0.1 V ²

¹10 Hz, 500 K, room temperature, without window and optics
²With reference to GND

Frequency Characteristics

Order Information

Please quote PY-I-QUAD-TO39(7+1) and your desired filter combination or quote specific part number PYXXXX as per filter table. Contact: sales@pyreos.com
